CERTIFICATIONS

Microsoft Technology Associate (MTA 98-361) Certification for Software Developments Fundamentals

RELEVANT EXPERIENCE

Microsoft, Twentynine Palms, CA 07/2021 – 11/2021

MICROSOFT SOFTWARE SYSTEMS ACADEMY

- Proven comprehension of core competencies such as encapsulation, inheritance, polymorphism, and abstraction through the utilization of Microsoft Visual Studio to design, create, and test upwards of seventy desktop and web applications.
- Created and implemented multiple relational databases, database management, and querying information via SQL Server, SQLite, and SQL Server Management Studio.
- Proficiency in the full integration of SQL Server databases and various desktop and web applications, complete with full CRUD capabilities.
- Utilized services of Microsoft Azure such as Application Insights to test, monitor, and improve the performance of self-written C# applications.
- Planned, designed, and created ten front end web applications via HTML& CSS complete with user friendly UI/UX.

MILITARY EXPERIENCE

United States Marine Corps, Twentynine Palms, CA 01/2020 – 07/2021

INTERMEDIATE SUPPLY CHIEF

- Performed the forecasting & budget formation of future fiscal year, managed \$12.3M in equipment, and purchased and distributed maintenance supplies resulting in the acquisition of an additional \$1.2 million in annual funding through accurate needs analysis.
- Coordinated employees during sorting, packaging, and return procedures that directly resulted in the timely receiving and delivering of military equipment with zero loss, theft, or mishaps during tenure.
- Timely maintenance of all routine requisitions for forty separate customer entities resulting in 98.4% mission readiness during the 2020 Marine Corps Logistics Command inspection.

United States Marine Corps, Okinawa, Japan
PROCUREMENT CHIEF

07/2018 – 01/2020

- Managed a six-member section responsible for the procurement, delivery, and administrative accountability of consumable repair parts to maintain military equipment which helped the organization to improve maintenance repair times by saving 800-man hours during a one-year period and personal recognition for each team member.
- Provided efficient, customer-centric support to customers both CONUS and OCONUS.
- Researched new vendors and partners to obtain cost-effective pricing for goods, reducing the annual maintenance cost by 20% in one year.

United States Marine Corps, Okinawa, Japan
SUPPLY ADMINISTRATION CHIEF

07/2016 – 07/2018

- Led a seven-person team to ensure tasks related to supply chain operations and inventory management are accurately complete in a timely manner to support military operations.
- Executed internal controls and safeguards for revenues and expenditures to alleviate risk and improve the fiscal posture of the organization.
- Developed and implemented internal standards and processes according to group requirements that directly resulted in process improvement and organization recognition.
- Managed budgets, assets, portfolios, and accounts payable while obtaining \$1.2M in additional annual funding to support forthcoming global deployment.

United States Marine Corps, Camp Pendleton South, CA
PROPERTY CONTROL CHIEF

07/2014 – 07/2016

- While deployed in support of Operation Inherent Resolve was directly tasked with the administrative accountability of infantry battalion gear-set with 17,570 unique items valued in total of over \$195 million, resulting in zero loss of equipment throughout the deployment.
- Coordinated with five separate military organizations across the CONUS in the movement, transfer, and joint maintenance of over 7,000 items valued over \$95 million through effective communications and teamwork skills.
- Led a team of three employees through effective communication and process improvement in the preparation of annual and bi-annual inventory management inspections; resulting in 100% gear accountability, zero findings, and the receipt of personal recognition for each team member.
